

The following rules apply to your homework:

- Problems should be written out in consecutive order. They need to be easy to locate.
- Space your work out so it is easy to read. (Paper is an inexpensive, renewable resource!)
- Proofs must be rigorous and clearly written in appropriate mathematical format.
- All graphs and drawings must be done in pencil.
- You are encouraged to discuss assignments with your classmates; however, you are required to write up your work independently.
